

“EFM from £250.00 per month”

“Wavenet EFM Ethernet Services” Highly reliable up to 20Mb symmetrical Internet for businesses who need high grade business

For most businesses today the broadband connection is vital. If you use VoIP (voice over IP), Hosted Services, WEB & Email traffic or have an ADSL broadband service that is continually disconnecting due to unreliability, then you need to consider an EFM service from Wavenet.

EFM Leased Lines (Dual)	£250.00 per month
EFM Leased Lines (Quad)	£350.00 per month
Installation From	£850.00

Conditions apply & all prices are excluding VAT.

Key features

EFM uses multiple copper pairs to deliver this service (Dual & Quad). By combining these pairs clients will receive a far superior service because if there is a fault with a single wire then the service will just slow down, rather than losing the connection completely.

- Dual or Quad service available
- Improved reliability over traditional ADSL / Broadband services
- Symmetrical, guaranteed speeds of up to 20Mb (Quad)
- Perfect for ISDN replacement, Hosted Services & SIP
- 7 hour fault fix
- Ethernet hardware installed in your premises

Improved reliability

Dual or Quad connections delivers true resilience & means your business stays up and running

Speed promise

A minimum guaranteed speed from your local exchange

Symmetrical speeds

EFM provides the same speed for both upload and download via a symmetrical service from your exchange

Perfect for VoIP, Hosted & SIP

With guaranteed speeds and excellent reliability EFM is a perfect for delivering both Hosted & SIP services

Business grade service levels

Faults are resolved in 6 hours

No line required

Unlike ADSL, EFM provides a direct Ethernet socket from your local exchange, freeing your phone line

EFM provides greater reliability. If one line goes down, the others and your business stay up

Benefit from symmetrical, guaranteed speeds of up to 20Mb for both uploads and downloads.
