

Fax to Email

Features

- Receive faxes directly to your E-mail Inbox – no fax required.
- Permanent electronic PDF copies of all faxes.

Benefits

- Save money on line rental. No need for a 2nd line.
- Save money on paper and toner costs.
- Kind to the environment - only print what you need to.
- No additional hardware or software capital outlay
- Faxes can be forwarded as easy as any email.
- Use your email Inbox to manage, sort and archive fax messages.

How It Works

Wavenet's 'Fax to Email' is a very simple application that replaces a receiving fax machine, converts the documents to PDF format and delivers them to your e-mail Inbox. Wavenet will provide you with a unique local rate number to which faxes can be sent.

What makes Wavenet's Fax2email service that extra special is that all calls are managed from within our network, ensuring that no additional hardware or software is required. It's an easy and confidential way of sending, receiving, filing and distributing fax documents.
